This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**HIGHLIGHTS**

- An innovative Hazard Identification technique was applied to biogas production
- Risk notions were collected by past accident analysis
- Hazardous equipment and corresponding critical events were identified
- Tailored bow-ties for critical events in biogas production were obtained
- Specific safety barriers were identified
