Title: Experimental Comparison of Residual Stresses for a Thermomechanical Model for the Simulation of Selective Laser Melting

Author: N.E. Hodge R.M. Ferencz R.M. Vignes

PII: S2214-8604(16)30094-X
DOI: <http://dx.doi.org/doi:10.1016/j.addma.2016.05.011>
Reference: ADDMA 94

To appear in:

Received date: 19-11-2015
Revised date: 4-2-2016
Accepted date: 8-5-2016

Please cite this article as: N.E. Hodge, R.M. Ferencz, R.M. Vignes, Experimental Comparison of Residual Stresses for a Thermomechanical Model for the Simulation of Selective Laser Melting, *Additive Manufacturing* (2016), <http://dx.doi.org/10.1016/j.addma.2016.05.011>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental Comparison of Residual Stresses for a Thermomechanical Model for the Simulation of Selective Laser Melting

N.E. Hodge¹, R.M. Ferencz¹ and R.M. Vignes²

¹Methods Development Group, LLNL

²Computational Engineering Division, LLNL

November 2015

This work was performed under the auspices of the U.S. Department of Energy by Lawrence Livermore National Laboratory under Contract DE-AC52-07NA27344. This work was funded by the Laboratory Directed Research and Development Program at LLNL under project tracking code 13-SI-002.
