

Author's Accepted Manuscript

Photoluminescent lateral flow based on non-radiative energy transfer for protein detection in human serum

Alejandro Zamora-Gálvez, Eden Morales-Narváez, Javier Romero, Arben Merkoçi

PII: S0956-5663(17)30620-6
DOI: <http://dx.doi.org/10.1016/j.bios.2017.09.013>
Reference: BIOS9987

To appear in: *Biosensors and Bioelectronic*

Received date: 13 July 2017
Revised date: 9 September 2017
Accepted date: 10 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

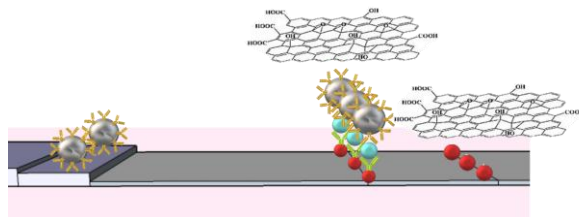

Graphical Abstract

To create your abstract, type over the instructions in the template box below.
Fonts or abstract dimensions should not be changed or altered

Photoluminescent lateral flow based on non-radiative energy transfer for protein detection in human serum

Alejandro Zamora-Gálvez^a, Eden Morales-Narváez^{a,b}, Javier Romero^a, and Arben Merkoçi^{a,c*}
Nanobioelectronics & Biosensors Group, Catalan Institute of Nanoscience and Nanotechnology (ICN2),
