Experimental measurements and mathematical modeling towards quantification of brain swelling stress

Stelios Angeli, Triantafyllos Stylianopoulos

PII: S0021-9290(17)30129-X

DOI: <http://dx.doi.org/10.1016/j.jbiomech.2017.02.028>

Reference: BM 8148

To appear in: *Journal of Biomechanics*

Accepted Date: 26 February 2017

Please cite this article as: S. Angeli, T. Stylianopoulos, Experimental measurements and mathematical modeling towards quantification of brain swelling stress, *Journal of Biomechanics* (2017), doi: <http://dx.doi.org/10.1016/j.jbiomech.2017.02.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental measurements and mathematical modeling towards quantification of brain swelling stress

Stelios Angeli and Triantafyllos Stylianopoulos

Cancer Biophysics laboratory, Department of Mechanical and Manufacturing Engineering,
University of Cyprus, Nicosia, 1678, Cyprus

Correspondence:

Triantafyllos Stylianopoulos,

Tel: +357 2289.2238, Fax: +357 2289.5081, E-mail: tstylian@ucy.ac.cy

Keywords: confined compression, Donnan effect, fixed charge density, solid stress, interstitial fluid pressure

Word Count: 3440 words
