This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Environment-friendly (CER) firms are more often than others located in “dirty” countries
- The level of de jure environmental regulations does not influence location decisions.
- The level of de facto regulation influences negatively CER firms’ location decisions
- Only CER firms with a well-established green reputation follow this pattern
