This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights of “A note on “Impact factor distribution revisited””

The following are some highlights of the attached manuscript:

- A reanalysis of a more complete version of the data in Huang (2017).
- The two exponent distribution shown to give the best fits for the years 2010 to 2013.
- The normal distribution shown to give the best fits for the years 2014 and 2015.
- The best fit assessed in terms of probability plots, quantile plots and five other criteria.

We thank you very much in advance for considering our work.
