This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Collaborative Dynamic Scenario Model for the Interaction of Critical Infrastructures

Murray Turoff^a, Victor A. Bañuls^b, Linda Plotnick^c, Starr Roxanne Hiltz^a, Miguel Ramírez de la Huerga^b

a. New Jersey Institute of Technology. University Heights. Newark, NJ 07102. USA.

b. Universidad Pablo de Olavide. Ctra / Utrera Km. 1. 41013 – Sevilla. España.

c. Jacksonville State University. 700 Pelham Road N. Jacksonville, AL 36265. USA

Murray Turoff is a Distinguished Professor Emeritus at the New Jersey Institute of Technology. He is a co-editor of a recent book on Emergency Management Information Systems (M.E. SharpE 2010). Besides his early and continuing work with the Delphi Method, he spent most of academic research career in the design and evaluation of Computer Mediated Communication systems. After 9/11 he turned his attention back to his early work in Emergency Management and in 2004, he was a cofounder of the international organization ISCRAM (Information Systems for Crisis Response and Management).

Victor Bañuls is an Associate Professor at the University Pablo de Olavide. Dr. Bañuls led various R&D projects and has several publications on foresight models, information systems for emergency management, evaluation of information systems and hybrid learning, as well as a recent book about information systems foresight. Dr. Bañuls has also been Visiting Research Scholar at the New Jersey Institute of Technology (NJ, USA), the Universidade Federal do Rio de Janeiro (Rio de Janeiro, Brazil) and the University of Tilburg (The Netherlands).

Linda Plotnick, Ph.D. is an Assistant Professor of CIS in the Mathematical, Computing, and Information Sciences Department at Jacksonville State University in Alabama, US where she recently received tenure. She is also Affiliated Faculty in the Emergency Management Department of the university. She received her doctorate from the New Jersey Institute of Technology in 2009 and continues to work on the research that was the topic of her dissertation, Partially Distributed Teams (hybrid virtual teams). She also conducts research on Social Media use in crisis and modeling the effects on critical infrastructures in crisis through cross impact analysis.

Starr Roxanne Hiltz is Distinguished Professor Emerita, College of Computing Sciences, NJIT. During 2010–2011 she held a “Cathedra de Excelencia” appointment at Carlos III University of Madrid, during which work began on this project. Research interests currently include virtual teams and online communities, online learning, Emergency Response Information Systems, Pervasive Computing, and social media.

Miguel Ramirez of Huerga holds a degree in economics from the University of Sevilla and is currently a PhD. student at the Pablo de Olavide University in the department of organization of business and Marketing (Management Information Systems).
