Stabilization of Gas-Phase Uranyl Complexes Enables Rapid Speciation using Electrospray Ionization and Ion Mobility-Mass Spectrometry

Austen L. Davis, Brian H. Clowers

PII: S0039-9140(17)30812-3  
DOI: <http://dx.doi.org/10.1016/j.talanta.2017.07.090>  
Reference: TAL17789

To appear in: *Talanta*

Received date: 28 April 2017  
Revised date: 27 July 2017  
Accepted date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Contents

<b>1</b>	<b>Introduction</b>	<b>2</b>
<b>2</b>	<b>Materials and Methods</b>	<b>4</b>
2.1	Mobility Measurements Under Low Field Conditions . . . . .	4
2.2	Sample Preparation and Delivery . . . . .	5
<b>3</b>	<b>Results and Discussion</b>	<b>5</b>
3.1	Multiplexing Acquisitions for IMS-MS . . . . .	5
3.2	Non-Complexed Uranyl: Multiplexing Comparison . . . . .	5
3.3	Complexed Uranyl: Multiplexing Comparison . . . . .	6
3.4	IMS- $m/z$ Trendlines and $m/z$ Noise Reduction . . . . .	6
3.5	Isotope Identification using Ion Mobility Extracted Drift Times . . . . .	7
3.6	Reduced Mobility and CCS Measurements . . . . .	7
3.7	Mobility Measurements Table . . . . .	8
3.8	Mobility Measurements from Uranyl Mixtures . . . . .	9
<b>4</b>	<b>Conclusion</b>	<b>9</b>
<b>5</b>	<b>Acknowledgments</b>	<b>10</b>
<b>6</b>	<b>References</b>	<b>10</b>

## List of Figures

1	apIMS-MS instrument schematic. . . . .	5
2	Drift time and $m/z$ spectra for the highest intensity observed doubly charged uranyl ion . . . . .	6
3	Drift time and $m/z$ spectra for the uranyl complexed to anion chloride with comparisons between signal averaged, Hadamard, and CIMS . . . . .	6
4	Noise reduction achieved for the low intensity peak corresponding to uranyl chloride complexed to 3 neutral MPSO. . . . .	7
5	Extracting isotopic profile of uranyl nitrate from a mixture containing uranyl acetate . . . . .	8
6	Experimentally obtained drift time spectra for uranyl chloride measured over four different electric field settings . . . . .	9
7	Mobility measurements for uranyl acetate, chloride, and nitrate from individual runs and mixture . . . . .	10

## List of Tables

1	Speciated uranyl salts mobility measurements . . . . .	9
