

## Accepted Manuscript

Title: The effect of hydration on the material and mechanical properties of cellulose nanocrystal-alginate composites

Authors: Megan Smyth, Marie-Stella M'Bengue, Maxime Terrien, Catherine Picart, Julien Bras, E. Johan Foster

PII: S0144-8617(17)31016-0  
DOI: <http://dx.doi.org/10.1016/j.carbpol.2017.09.002>  
Reference: CARP 12747

To appear in:

Received date: 15-5-2017  
Revised date: 18-8-2017  
Accepted date: 2-9-2017

Please cite this article as: Smyth, Megan., M'Bengue, Marie-Stella., Terrien, Maxime., Picart, Catherine., Bras, Julien., & Foster, E.Johan., The effect of hydration on the material and mechanical properties of cellulose nanocrystal-alginate composites. *Carbohydrate Polymers* <http://dx.doi.org/10.1016/j.carbpol.2017.09.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
