

## Accepted Manuscript

Title: Ternary polysaccharide complexes: colloidal drug delivery systems stabilized in physiological media

Authors: Danjun Wu, Agathe Ensinas, Bernard Verrier, Armelle Cuvillier, Gaël Champier, Stephane Paul, Thierry Delair

PII: S0144-8617(17)30568-4  
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2017.05.051>  
Reference: CARP 12337

To appear in:

Received date: 29-3-2017  
Revised date: 16-5-2017  
Accepted date: 17-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Ternary polysaccharide complexes: colloidal drug delivery systems stabilized in physiological media

## Highlights:

- Assembly of positive and negative ternary complexes from natural polysaccharides
- Colloids stabilized in physiological conditions via ternary complexes strategy
- Colloids loaded with anti-retroviral drug and surface decorated with IgAs for targeting
- The nano-drug carriers prevented cell infection by the HIV virus
