Heterocyclic pharmacology of new rhinovirus antiviral agents: A combined computational and experimental study

Laurène Da Costa, Els Scheers, Antonio Coluccia, Alessia Rosetti, Manon Roche, Johan Neyts, Thierry Terme, Roberto Cirilli, Carmen Mirabelli, Romano Silvestri, Patrice Vanelle

PII: S0223-5234(17)30750-X

DOI: [10.1016/j.ejmech.2017.09.036](https://doi.org/10.1016/j.ejmech.2017.09.036)

Reference: EJMECH 9751

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 26 August 2017

Revised Date: 16 September 2017

Accepted Date: 18 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
