A flexible mechanochemical route for the synthesis of copper oxide nanorods/nanoparticles/nanowires for supercapacitor applications: The effect of morphology on the charge storage ability

Bahareh Ameri, Saied Saeed Hosseiny Davarani, Reza Roshani, Hamid Reza Moazami, Azadeh Tadjarodi

PII: S0925-8388(16)33264-9

DOI: [10.1016/j.jallcom.2016.10.144](https://doi.org/10.1016/j.jallcom.2016.10.144)

Reference: JALCOM 39311

To appear in: *Journal of Alloys and Compounds*

Received Date: 16 July 2016

Revised Date: 27 September 2016

Accepted Date: 16 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A flexible mechanochemical route for the synthesis of copper oxide nanorods/nanoparticles/nanowires for supercapacitor applications: the effect of morphology on the charge storage ability
