A new multi-objective discrete robust optimization algorithm for engineering design

Guangyong Sun , Huile Zhang , Jianguang Fang , Guangyao Li , Qing Li

PII: S0307-904X(17)30534-6
DOI: [10.1016/j.apm.2017.08.016](https://doi.org/10.1016/j.apm.2017.08.016)
Reference: APM 11928

To appear in: *Applied Mathematical Modelling*

Received date: 23 December 2016
Revised date: 18 July 2017
Accepted date: 23 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A novel multi-objective discrete robust optimization algorithm was firstly presented.
- The presented method was verified by a mathematical example and a ten-bar truss design.
- Robust optimization design for the crashworthiness design of full vehicle was conducted.
