Detection and localisation of structural damage based on the error in the constitutive relations in dynamics

T.A.N. Silva, N.M.M. Maia

PII: S0307-904X(16)30383-3
DOI: [10.1016/j.apm.2016.07.002](https://doi.org/10.1016/j.apm.2016.07.002)
Reference: APM 11264

To appear in: *Applied Mathematical Modelling*

Received date: 18 April 2016
Revised date: 8 July 2016
Accepted date: 21 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Simple damage localisation indicator.
- Explicit formulation of the ECR in terms of frequency response data.
- Analysis of the indicator regarding different measurement assumptions
