This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Develops a two-level dual-channel supply chain with online customization
- Markup margin, production quantity and number of shipments are decision variable
- The dual-channel strategy outperforms the single-channel strategy
- Extensive analysis was performed with managerial insights and findings provided
