Statistical optimization of process parameters for removal of dyes from wastewater on chitosan cenospheres nanocomposite using response surface methodology

Markandeya, N. Dhiman, S.P. Shukla, G.C. Kisku

PII: S0959-6526(17)30292-5

DOI: [10.1016/j.jclepro.2017.02.078](https://doi.org/10.1016/j.jclepro.2017.02.078)

Reference: JCLP 9004

To appear in: *Journal of Cleaner Production*

Received Date: 25 September 2016

Revised Date: 12 January 2017

Accepted Date: 11 February 2017

Please cite this article as: Markandeya , Dhiman N, Shukla SP, Kisku GC, Statistical optimization of process parameters for removal of dyes from wastewater on chitosan cenospheres nanocomposite using response surface methodology, *Journal of Cleaner Production* (2017), doi: 10.1016/j.jclepro.2017.02.078.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Schematic illustration of dye adsorption on CHCN nanocomposite
