Stability analysis of solutions for the sixth-order nonlinear Boussinesq water wave equations in two-dimensions and its applications

M.A. Helal, A.R. Seadawy, M. Zekry

PII: S0577-9073(16)30767-5
DOI: [10.1016/j.cjph.2017.02.007](https://doi.org/10.1016/j.cjph.2017.02.007)
Reference: CJPH 177

To appear in: *Chinese Journal of Physics*

Received date: 21 November 2016
Revised date: 9 February 2017
Accepted date: 9 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The 6-order Boussinesq equation is considered.
- The propagation of long capillary-gravity waves is discussed
- Solitary waves, Jacobi and Weierstrass elliptic solutions are obtained.
