Radiative Williamson nanofluid flow over a convectively heated Riga plate with chemical reaction-A numerical approach

M. Ramzan, M. Bilal, Jae Dong Chung

PII: S0577-9073(17)30275-7
DOI: [10.1016/j.cjph.2017.04.014](https://doi.org/10.1016/j.cjph.2017.04.014)
Reference: CJPH 253

To appear in: *Chinese Journal of Physics*

Received date: 15 March 2017
Revised date: 21 April 2017
Accepted date: 23 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Flow of Williamson nanofluid over a Riga plate is studied.
- Flow of Williamson nanofluid over a Riga plate is studied.
- Numerical solution is obtained using Shooting method is obtained.
- Velocity distribution is decreasing function of Williamson fluid parameter.
