Effect of particle size on the thermoluminescence dosimetric properties of household salt

Ülkü Rabia Yüce, Birol Engin

PII: S1350-4487(17)30352-9

DOI: [10.1016/j.radmeas.2017.05.013](https://doi.org/10.1016/j.radmeas.2017.05.013)

Reference: RM 5796

To appear in: *Radiation Measurements*

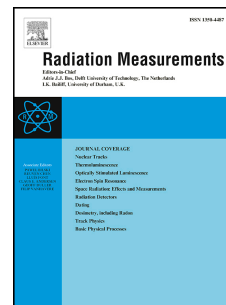

Received Date: 15 July 2016

Revised Date: 21 April 2017

Accepted Date: 15 May 2017

Please cite this article as: Yüce, Ü. Rabia., Engin, B., Effect of particle size on the thermoluminescence dosimetric properties of household salt, *Radiation Measurements* (2017), doi: 10.1016/j.radmeas.2017.05.013.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of Particle Size on the Thermoluminescence Dosimetric Properties of Household**Salt**
