Triglyceride increase in the core of high-density lipoproteins augments apolipoprotein dissociation from the surface: Potential implications for treatment of apolipoprotein deposition diseases

Shobini Jayaraman, Jose Luis Sánchez-Quesada, Olga Gursky

PII: S0925-4439(16)30254-X
DOI: doi: [10.1016/j.bbadis.2016.10.010](https://doi.org/10.1016/j.bbadis.2016.10.010)
Reference: BBADIS 64576

To appear in: *BBA - Molecular Basis of Disease*

Received date: 18 August 2016
Revised date: 13 October 2016
Accepted date: 16 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Triglyceride increase in the core of high-density lipoproteins
augments apolipoprotein dissociation from the surface:
Potential implications for treatment of apolipoprotein deposition diseases**

Running title: Triglyceride-lowering therapies may help alleviate apoA-I amyloidosis

Authors: Shobini Jayaraman¹, Jose Luis Sánchez-Quesada², Olga Gursky¹
