This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Effects of two different fabrics on skin barrier function under real pressure conditions

Running head: Skin response to spacer fabric

Keywords: pressure ulcer, 3D textile, spacer fabric, microclimate, transepidermal water loss, stratum corneum hydration

Tables: 2

Figures: 4

Authors: M. Schario<sup>1</sup>, T. Tomova- Simitchieva<sup>1</sup>, A. Lichterfeld<sup>1</sup>, H. Herfert<sup>2</sup>, G. Dobos, Lahmann, N.<sup>3</sup>, U. Blume-Peytavi<sup>1</sup>, J. Kottner<sup>1</sup>
