This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Medical Male Circumcision:

How does price affect the risk-profile of take-up?

REBECCA THORNTON, UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN¹

SUSAN GODLONTON, WILLIAMS COLLEGE AND IFPRI

April 2016

¹ Corresponding author: Rebecca Thornton Department of Economics, University of Illinois, 214 DKH 1407 W. Gregory, Urbana IL, 61801, USA; rebeccat@illinois.edu; Funding for this study was provided by 3ie, and Rackham at the University of Michigan. The authors gratefully acknowledge use of the services and facilities of the Population Studies Center at the University of Michigan, funded by NICHD Center Grant R24 HD041028. We are grateful for the hard work and cooperation of BLM and especially Brendan Hayes. We acknowledge the extensive contributions of the field team including Eirin Forsund, Victor Kanje, Ernest Mlenga, Ephraim Mwaipopo, Christopher Nyirenda, Justin Schon, Kelvin Balakasi, Thandizo Shaba, Hector Chilimani, Ronald Manjolo, Matthews Mfune, and Collins Zamawe. We also thank the Development Ideational Change Project at the University of Michigan Population Studies Center as well as helpful contributions from Anjali Sarver.
