Molecular prevalence of putative virulence-associated genes in *Brucella melitensis* and *Brucella abortus* isolates from human and livestock specimens in Iran

Iman Hashemifar, Abbas Yadegar, Faramarz Masjedan Jazi, Nour Amirmozafari

PII: S0882-4010(17)30140-7

DOI: [10.1016/j.micpath.2017.03.007](https://doi.org/10.1016/j.micpath.2017.03.007)

Reference: YMPAT 2161

To appear in: *Microbial Pathogenesis*

Received Date: 13 February 2017

Revised Date: 3 March 2017

Accepted Date: 6 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Molecular prevalence of putative virulence-associated genes in *Brucella melitensis* and**
2 ***Brucella abortus* isolates from human and livestock specimens in Iran**
