

## Accepted Manuscript

Are wolves just wasps with teeth? What invertebrates can teach us about mammal top predators

Amanda J. Meadows, David W. Crowder, William E. Snyder

PII: S2352-2496(15)30037-9  
DOI: doi: [10.1016/j.fooweb.2016.09.004](https://doi.org/10.1016/j.fooweb.2016.09.004)  
Reference: FOOWEB 39

To appear in:

Received date: 8 December 2015  
Revised date: 26 July 2016  
Accepted date: 17 September 2016

Please cite this article as: Meadows, Amanda J., Crowder, David W., Snyder, William E., Are wolves just wasps with teeth? What invertebrates can teach us about mammal top predators, (2016), doi: [10.1016/j.fooweb.2016.09.004](https://doi.org/10.1016/j.fooweb.2016.09.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Are wolves just wasps with teeth? What invertebrates can teach us about mammal top predators
