Groundwater recharge estimation under semi arid climate: Case of Northern Gafsa watershed, Tunisia

Melki Achraf, Abdollahi Khodayar, Fatahi Rouhallah, Abida Habib

PII: S1464-343X(17)30164-4

DOI: [10.1016/j.jafrearsci.2017.04.020](https://doi.org/10.1016/j.jafrearsci.2017.04.020)

Reference: AES 2888

To appear in: *Journal of African Earth Sciences*

Received Date: 6 January 2017

Revised Date: 12 April 2017

Accepted Date: 20 April 2017

Please cite this article as: Achraf, M., Khodayar, A., Rouhallah, F., Habib, A., Groundwater recharge estimation under semi arid climate: Case of Northern Gafsa watershed, Tunisia, *Journal of African Earth Sciences* (2017), doi: 10.1016/j.jafrearsci.2017.04.020.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Groundwater recharge estimation under semi arid climate: case of Northern**
2 **Gafsa watershed, Tunisia**
