Optimal combinations of isometric normalization tests for the production of maximum voluntary activation of the shoulder muscles

Fabien Dal Maso, Ph.D, Patrick Marion, M.Sc., Mickaël Begon, Ph.D

PII: S0003-9993(16)00030-7

DOI: [10.1016/j.apmr.2015.12.024](https://doi.org/10.1016/j.apmr.2015.12.024)

Reference: YAPMR 56417

To appear in: *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION*

Received Date: 2 November 2015

Revised Date: 21 December 2015

Accepted Date: 22 December 2015

Please cite this article as: Maso FD, Marion P, Begon M, Optimal combinations of isometric normalization tests for the production of maximum voluntary activation of the shoulder muscles, *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION* (2016), doi: 10.1016/j.apmr.2015.12.024.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: Normalization of shoulder EMG signals

Title: Optimal combinations of isometric normalization tests for the production of maximum voluntary activation of the shoulder muscles

Authors: Fabien Dal Maso, Ph.D.<sup>1,2,3</sup>; Patrick Marion, M.Sc.<sup>1,3</sup>; Mickaël Begon, Ph.D.<sup>1,3</sup>.

Affiliations: <sup>1</sup>Laboratoire de Simulation et de Modélisation du Mouvement, Université de Montréal, Montréal, Canada; <sup>2</sup>Rehabilitation Engineering Chair Applied to Pediatrics (RECAP), École Polytechnique de Montréal, Montréal, Canada; <sup>3</sup>CRME - Sainte Justine UHC, Montréal, Canada.

Acknowledgements: this study was supported by the Natural Sciences and Engineering Research Council of Canada (NSERC) and Médecus. The postdoctoral fellowship of the first author was supported by the Groupe de Recherche en Sciences et Technologies Biomédicales (GRSTB) program. The authors acknowledge Yoann Blache and Sylvain Gaudet for their help in data collection.

Conflict of interest statement: the authors have no conflict of interest to declare
