This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Bioengineering Kidneys for Transplantation

Maria Lucia L. Madariaga, MD^{1,2,3}, Harald C. Ott, MD^{1,2,3}

¹Division of Thoracic Surgery, Department of Surgery, Massachusetts General Hospital

²Harvard Medical School, Harvard Stem Cell Institute

³Center for Regenerative Medicine

Financial support: Dr. Madariaga was supported by a fellowship from the International Heart and Lung Transplantation Society and Fellowship Award F32HL117540 from the National Heart, Lung, and Blood Institute (NHLBI) of the National Institutes of Health (NIH). The kidney regeneration project was supported by the NIH Director's New Innovator Award DP2 OD008749-01 (HC Ott).

Financial disclosure and conflict of interest statement: HC Ott is founder and stockholder of IVIVA Medical Inc. This relationship did not affect the content or conclusions contained in this manuscript.
