Title: Human induced pluripotent stem cells in Parkinson's disease: a novel cell source of cell therapy and disease modeling

Author: Wen Li Shengdi Chen Jia-Yi Li

| PII: | S0301-0082(15)00098-2 |
|----------------|---|
| DOI: | http://dx.doi.org/doi:10.1016/j.pneurobio.2015.09.009 |
| Reference: | PRONEU 1396 |
| To appear in: | Progress in Neurobiology |
| Received date: | 26-11-2014 |
| Revised date: | 15-9-2015 |
| Accepted date: | 17-9-2015 |

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlight points:

- 1. iPSCs are novel cell sources for cell therapy, drug screening and disease modeling
- 2. Virus-free approaches combined with small molecules promote reprogramming of iPSCs
- 3. Dopaminergic differentiation is improved by modulation of signaling pathways

Human induced pluripotent stem cells in Parkinson's disease: a novel cell source

of cell therapy and disease modeling
