The immediate effects of acoustic trauma on excitation and inhibition in the inferior colliculus: a Wiener-kernel analysis

A.N. Heeringa, P. van Dijk

PII: S0378-5955(15)30052-6

DOI: [10.1016/j.heares.2015.10.007](https://doi.org/10.1016/j.heares.2015.10.007)

Reference: HEARES 7034

To appear in: *Hearing Research*

Received Date: 12 July 2015

Revised Date: 27 September 2015

Accepted Date: 15 October 2015

Please cite this article as: Heeringa, A.N., van Dijk, P., The immediate effects of acoustic trauma on excitation and inhibition in the inferior colliculus: a Wiener-kernel analysis, *Hearing Research* (2015), doi: 10.1016/j.heares.2015.10.007.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 The immediate effects of acoustic trauma on excitation and inhibition in the inferior
2 colliculus: a Wiener-kernel analysis
