The role of initial hexagonal self-ordering in anodic nanotube growth in ionic liquid

Olga Lebedeva, Dmitry Kultin, Igor Kudryavtsev, Natalia Root, Leonid Kustov

PII: S1388-2481(17)30005-X
DOI: doi: [10.1016/j.elecom.2017.01.005](https://doi.org/10.1016/j.elecom.2017.01.005)
Reference: ELECOM 5854

To appear in: *Electrochemistry Communications*

Received date: 5 December 2016
Revised date: 23 December 2016
Accepted date: 5 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Role of Initial Hexagonal Self-Ordering in Anodic Nanotube Growth in Ionic Liquid
