Paradigm shift – Metabolic transformation of docosahexaenoic and eicosapentaenoic acids to bioactives exemplify the promise of fatty acid drug discovery

Ganesh V. Halade, Laurence M. Black, Mahendra Kumar Verma

PII: S0734-9750(18)30037-5
DOI: doi:[10.1016/j.biotechadv.2018.02.014](https://doi.org/10.1016/j.biotechadv.2018.02.014)
Reference: JBA 7224
To appear in: *Biotechnology Advances*
Received date: 19 September 2017
Revised date: 1 February 2018
Accepted date: 25 February 2018

Please cite this article as: Ganesh V. Halade, Laurence M. Black, Mahendra Kumar Verma , Paradigm shift – Metabolic transformation of docosahexaenoic and eicosapentaenoic acids to bioactives exemplify the promise of fatty acid drug discovery. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Jba(2017), doi:[10.1016/j.biotechadv.2018.02.014](https://doi.org/10.1016/j.biotechadv.2018.02.014)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Paradigm Shift - Metabolic Transformation of Docosahexaenoic and Eicosapentaenoic Acids to Bioactives Exemplify the Promise of Fatty Acid Drug Discovery

Ganesh V. Halade¹, Laurence M. Black² and Mahendra Kumar Verma³
