Title: Influence of Binary Solvent System on the Stability and Efficiency of Liquid Dye Sensitized Solar Cells

Authors: Abebe Tedla, Yian Tai

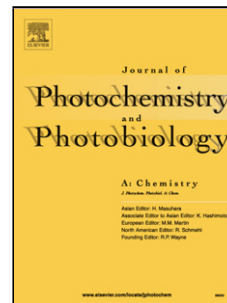

PII: S1010-6030(17)31843-9
DOI: <https://doi.org/10.1016/j.jphotochem.2018.03.005>
Reference: JPC 11174

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 22-12-2017
Revised date: 22-2-2018
Accepted date: 3-3-2018

Please cite this article as: Abebe Tedla, Yian Tai, Influence of Binary Solvent System on the Stability and Efficiency of Liquid Dye Sensitized Solar Cells, *Journal of Photochemistry and Photobiology A: Chemistry* <https://doi.org/10.1016/j.jphotochem.2018.03.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of Binary Solvent System on the Stability and Efficiency of Liquid Dye Sensitized Solar Cells

Abebe Tedla^{1,2}, Yian Tai^{1*}
