Title: Vanadium–Doped Porous Silica Materials with High Catalytic Activity and Stability for Propane Dehydrogenation Reaction

Authors: Ping Hu, Wan–Zhong Lang, Xi Yan, Xing–Fan Chen, Ya–Jun Guo

PII: S0926-860X(18)30023-1
DOI: <https://doi.org/10.1016/j.apcata.2018.01.014>
Reference: APCATA 16521

To appear in: *Applied Catalysis A: General*

Received date: 9-11-2017
Revised date: 25-12-2017
Accepted date: 14-1-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Vanadium–Doped Porous Silica Materials with High Catalytic Activity and Stability for Propane Dehydrogenation Reaction
