Carbide-derived carbon obtained *via* bromination of titanium carbide: Comparative analysis with chlorination and hydrogen storage studies

Sławomir Dyjak, Wojciech Kiciński, Małgorzata Norek, Michał Dyjak, Stanisław Cudziło

PII: S1387-1811(18)30347-0

DOI: [10.1016/j.micromeso.2018.06.037](https://doi.org/10.1016/j.micromeso.2018.06.037)

Reference: MICMAT 8990

To appear in: *Microporous and Mesoporous Materials*

Received Date: 28 February 2018

Revised Date: 13 June 2018

Accepted Date: 22 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
