Sulfide-modified zerovalent iron for enhanced antimonite sequestration: Characterization, performance, and reaction mechanisms

Shasha Huang, Chunhua Xu, Qianqian Shao, Yahao Wang, Bingliang Zhang, Baoyu Gao, Weizhi Zhou, Paul G. Tratnyek

PII: S1385-8947(18)30033-0
DOI: <https://doi.org/10.1016/j.cej.2018.01.033>
Reference: CEJ 18353

To appear in: *Chemical Engineering Journal*

Received Date: 7 September 2017
Revised Date: 5 January 2018
Accepted Date: 6 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Sulfide-modified zerovalent iron for enhanced antimonite sequestration: Characterization, performance, and reaction mechanisms
