Title: Advanced optimization strategies for integrated dynamic process operations

Author: Lorenz T. Biegler

PII: S0098-1354(17)30371-X

DOI: <https://doi.org/doi:10.1016/j.compchemeng.2017.10.016>

Reference: CACE 5922

To appear in: *Computers and Chemical Engineering*

Received date: 29-6-2017

Accepted date: 14-10-2017

Please cite this article as: Lorenz T. Biegler, Advanced optimization strategies for integrated dynamic process operations, *Computers and Chemical Engineering* (2017), <https://doi.org/10.1016/j.compchemeng.2017.10.016>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dynamic optimization strategies based on simultaneous collocation are reviewed

Three real-world applications are described for complex, exothermic reactive systems

Multi-stage formulations are described for grade transition of LLDPE processes

Integrated dynamic optimization/ scheduling policies described for polyol processes
