Title: Economic Opportunities for Industrial Systems from Frequency Regulation Markets

Author: Alexander W. Dowling Victor M. Zavala

PII: S0098-1354(17)30323-X

DOI: <https://doi.org/doi:10.1016/j.compchemeng.2017.09.018>

Reference: CACE 5898

To appear in: *Computers and Chemical Engineering*

Received date: 15-6-2017

Revised date: 2-9-2017

Accepted date: 21-9-2017

Please cite this article as: Alexander W. Dowling, Victor M. Zavala, Economic Opportunities for Industrial Systems from Frequency Regulation Markets, *Computers and Chemical Engineering* (2017), <https://doi.org/10.1016/j.compchemeng.2017.09.018>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Identifies dominant harmonics in frequency regulation market signals
- Demonstrates that slow systems can naturally dampen high-frequency harmonics
- Proposes approach to identify maximum frequency regulation capacity that a system can provide
