Abstract

This article contains firm-level data on 1) aggregated corporate governance score, and 2) financial data for the period 2010-2017. The study includes 626 companies from 6 Asian countries: China, India, Indonesia, Japan, South Korea and Thailand. Aggregated corporate governance score is calculated using 13 firm-level attributes: board size, board independence, CEO duality, board meeting attendance, independence of audit committee, auditor ratification, independence of compensation committee, independence of nomination committee, shareholder-approved poison pill, dual class unequal voting rights of common shares, staged board, diversity of board and board duration. Finally, six firm-level financial data are included.

Specifications Table

Subject area	Finance
More specific subject	Corporate finance, Corporate governance
area	
Type of data	Excel file
How data was acquired	Bloomberg database
	Thomson Reuters database
	Prowess-CMIE database
Data format	Filtered, Processed
