Titania nanotubes modified by a pyrolyzed metal-organic framework with zero valent iron centres as a photoanode with enhanced photoelectrochemical, photocatalytical activity and high capacitance

M. Szkoda, K. Trzciński, A.P. Nowak, E. Coy, L. Wicikowski, M. Łapiński, K. Siuzdak, A. Lisowska-Oleksiak

PII: S0013-4686(18)31020-X

DOI: [10.1016/j.electacta.2018.05.015](https://doi.org/10.1016/j.electacta.2018.05.015)

Reference: EA 31801

To appear in: *Electrochimica Acta*

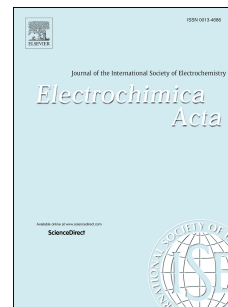

Received Date: 21 December 2017

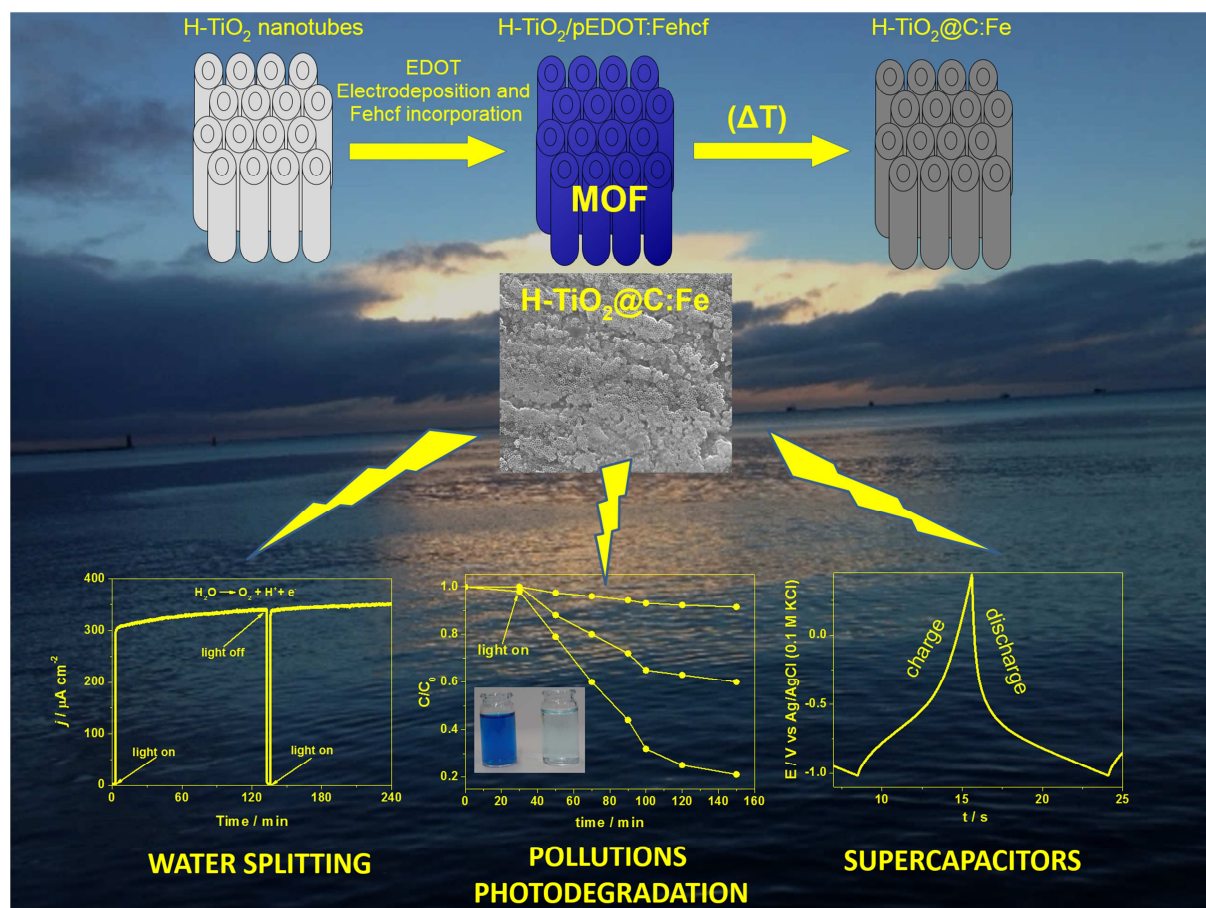

Revised Date: 5 April 2018

Accepted Date: 2 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
