The Effect of Cations on Reversibility and Thermodynamic Stability During Thermal Denaturation of Lysozyme

Polychronis Stavropoulos, Angelos Thanassoulas, George Nounesis

PII: S0021-9614(17)30366-X
DOI: <https://doi.org/10.1016/j.jct.2017.10.006>
Reference: YJCHT 5240

To appear in: *J. Chem. Thermodynamics*

Received Date: 15 June 2017
Revised Date: 25 September 2017
Accepted Date: 6 October 2017

Please cite this article as: P. Stavropoulos, A. Thanassoulas, G. Nounesis, The Effect of Cations on Reversibility and Thermodynamic Stability During Thermal Denaturation of Lysozyme, *J. Chem. Thermodynamics* (2017), doi: <https://doi.org/10.1016/j.jct.2017.10.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Effect of Cations on Reversibility and Thermodynamic Stability During Thermal Denaturation of Lysozyme

Polychronis Stavropoulos^{*}, *Angelos Thanassoulas*, *George Nounesis*.

KEYWORDS

Differential Scanning Calorimetry, Thermodynamic stability, Reversibility, Lysozyme, Cation Effects.

ABBREVIATIONS

DSC: Differential Scanning Calorimetry

HEWL: Hen Egg-White Lysozyme

ΔC_p : Apparent Heat Capacity Change

ΔG : Gibbs Free Energy Change

RI: Refolding Index
