Title: KINETIC ANALYSIS OF THE ADSORPTION OF DYES FROM HIGH STRENGTH WASTEWATER ON CEMENT KILN DUST

Authors: Y.H. Magdy, H. Altaher

PII: S2213-3437(18)30009-5
DOI: <https://doi.org/10.1016/j.jece.2018.01.009>
Reference: JECE 2129

To appear in:

Received date: 2-10-2017
Revised date: 2-1-2018
Accepted date: 3-1-2018

Please cite this article as: Y.H.Magdy, H.Altaher, KINETIC ANALYSIS OF THE ADSORPTION OF DYES FROM HIGH STRENGTH WASTEWATER ON CEMENT KILN DUST, Journal of Environmental Chemical Engineering <https://doi.org/10.1016/j.jece.2018.01.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

KINETIC ANALYSIS OF THE ADSORPTION OF DYES FROM HIGH STRENGTH WASTEWATER ON CEMENT KILN DUST

Graphical Abstract

PROPOSED FLOW CHART FOR CKD LIFE CYCLE

HIGHLIGHTS

- The sustainable use of solid wastes can be considered as an asset to green engineering
- CKD has very high adsorption capacity compared to many adsorbents
- CKD is safe to use, has low cost and availability, and easy to dispose after use
