Title: Perspectives on molecular modeling of supercritical fluids: From equations of state to molecular simulations. Recent advances, remaining challenges and opportunities

Author: Lourdes F. Vega

PII: S0896-8446(17)30790-8
DOI: <https://doi.org/10.1016/j.supflu.2017.12.025>
Reference: SUPFLU 4150

To appear in: *J. of Supercritical Fluids*

Received date: 29-10-2017
Revised date: 15-12-2017
Accepted date: 16-12-2017

Please cite this article as: Lourdes F.Vega, Perspectives on molecular modeling of supercritical fluids: From equations of state to molecular simulations.Recent advances, remaining challenges and opportunities, The Journal of Supercritical Fluids <https://doi.org/10.1016/j.supflu.2017.12.025>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Perspectives on molecular modeling of supercritical fluids: from equations of state to molecular simulations. Recent advances, remaining challenges and opportunities
