Novel use of superdisintegrants as viscosity enhancing agents in biocompatible polymer films containing griseofulvin nanoparticles

Ramana Susarla, Afolawemi Afolabi, Darshan Patel, Ecevit Bilgili, Rajesh N. Davé

PII: S0032-5910(15)00482-9
DOI: doi: [10.1016/j.powtec.2015.06.024](https://doi.org/10.1016/j.powtec.2015.06.024)
Reference: PTEC 11067

To appear in: *Powder Technology*

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Novel use of superdisintegrants as viscosity enhancing agents in biocompatible
polymer films containing griseofulvin nanoparticles**
