

Accepted Manuscript

Title: Optimal configuration of multiple-chiller plants under cooling load uncertainty for different climate effects and building types

Authors: Pei Huang, Gongsheng Huang, Godfried Augenbroe

PII: S0378-7788(17)31501-3
DOI: <https://doi.org/10.1016/j.enbuild.2017.10.040>
Reference: ENB 8060

To appear in: *ENB*

Received date: 25-4-2017
Revised date: 11-10-2017
Accepted date: 11-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Optimal configuration of multiple-chiller plants under cooling load uncertainty for different climate effects and building types
