Electrosorption of organic acids from aqueous bio-oil and conversion into hydrogen via microbial electrolysis cells

Lydia Kyoung-Eun Park, Scott J. Satinover, Sotira Yiacoumi, Richard T. Mayes, Abhijeet P. Borole, Costas Tsouris

PII: S0960-1481(18)30220-9

DOI: [10.1016/j.renene.2018.02.076](https://doi.org/10.1016/j.renene.2018.02.076)

Reference: RENE 9807

To appear in: *Renewable Energy*

Received Date: 17 July 2017

Revised Date: 5 February 2018

Accepted Date: 17 February 2018

Please cite this article as: Park LK-E, Satinover SJ, Yiacoumi S, Mayes RT, Borole AP, Tsouris C, Electrosorption of organic acids from aqueous bio-oil and conversion into hydrogen via microbial electrolysis cells, *Renewable Energy* (2018), doi: 10.1016/j.renene.2018.02.076.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Electrosorption of Organic Acids from Aqueous Bio-oil and
2 Conversion into Hydrogen via Microbial Electrolysis Cells
