Parkinsonism is Associated with Altered Primary Motor Cortex Plasticity in Frontotemporal Dementia-PPA variant

Di Stasio Flavio, Suppa Antonio, Fabbrini Andrea, Marsili Luca, Asci Francesco, Conte Antonella, Trebbastoni Alessandro, De Lena Carlo, Berardelli Alfredo

PII: S0197-4580(18)30194-5

DOI: [10.1016/j.neurobiolaging.2018.05.026](https://doi.org/10.1016/j.neurobiolaging.2018.05.026)

Reference: NBA 10262

To appear in: *Neurobiology of Aging*

Received Date: 29 January 2018

Revised Date: 21 May 2018

Accepted Date: 21 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Parkinsonism is Associated with Altered Primary Motor Cortex Plasticity in Frontotemporal Dementia-PPA variant

Di Stasio Flavio^{a}, Suppa Antonio^{a,b*}, Fabbrini Andrea^b, Marsili Luca^b, Asci Francesco^b, Conte Antonella^{a,b}, Trebbastoni Alessandro^b, De Lena Carlo^b, Berardelli Alfredo^{a,b}*

^bDepartment of Human Neuroscience, Sapienza University of Rome, Italy

* The authors equally contributed to the study.

Keywords: Frontotemporal degeneration, parkinsonism, cortical plasticity, primary motor cortex, theta-burst stimulation.

Running Head: M1 LTP/LTD-like plasticity in FTD

Number of Words (Abstract): 187

Number of Words (Introduction): 551

Number of Words (Discussion): 1345

Number of Words (excluding references): 3768

Number of Figures: 5

Numer of Tables: 2

Number of References: 48
