Comparison of virtual reality and hands on activities in science education via functional near infrared spectroscopy

Richard Lamb, Pavlo Antonenko, Elisabeth Etopio, Amanda Seccia

PII: S0360-1315(18)30114-3

DOI: [10.1016/j.compedu.2018.05.014](https://doi.org/10.1016/j.compedu.2018.05.014)

Reference: CAE 3357

To appear in: *Computers & Education*

Received Date: 9 July 2017

Revised Date: 14 May 2018

Accepted Date: 16 May 2018

Please cite this article as: Lamb R., Antonenko P., Etopio E. & Seccia A., Comparison of virtual reality and hands on activities in science education via functional near infrared spectroscopy, *Computers & Education* (2018), doi: 10.1016/j.compedu.2018.05.014.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparison of virtual reality and hands on activities in science education via functional near infrared spectroscopy
