A hybrid machine-learning and optimization method to solve bi-level problems

Saeed Asadi Bagloee , Mohsen Asadi , Majid Sarvi ,
Michael Patriksson

PII: S0957-4174(17)30795-9
DOI: [10.1016/j.eswa.2017.11.039](https://doi.org/10.1016/j.eswa.2017.11.039)
Reference: ESWA 11682

To appear in: *Expert Systems With Applications*

Received date: 6 October 2017
Revised date: 8 November 2017
Accepted date: 15 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Bilevel problem has many applications.
- It is an NP-hard problem, difficult to solve.
- Machine learning hybridized with traditional optimization method is developed.
- Numerical results of a real dataset are highly promising.
