This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Analysis of the optimal reject option for supervised classification
- Problems of reject option based ROC curve for small-sample problems
- New methods of reject option designed for small-sample problems
- Improvement of performance of classifiers with reject option
