This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A novel data reduction strategy is presented.
- Multi measure strategy is used to reduce the number of features.
- Training data is significantly reduced, without greatly affecting the IDS accuracy.
- Boost up the detection process speed.
- Does not require large computational resources to process a huge amount of data.
